TELME EMERGENCY SYSTEM

You can store up to 4 emergency numbers (family, neighbours, friends, emergency services).

- In case of an emergency press and hold the emergency button. The emergency key will still work when the key lock is enabled.
- Press the emergency button to make an emergency call. Up to 4 numbers will be called in a predetermined order until the emergency call is answered.

This process is repeated 3 times.

Note: The phone does not recognize whether a person, an answering machine or voice mail takes off and sees this as a successful emergency!

- To abort the emergency call press long 🐯
- During the emergency call sequence, the mobile telephone sounds a warning signal to alert the people around you about the emergency.
- If no emergency number is stored, your prepaid-card has run out or you are outside of the reception area of your network operator, the international emergency number 112 will be called.

Note: If you want to save numbers from official services, police, firefighter, etc. as emergency numbers, you have to clarify this with these institutions. No liability will be assumed for possible costs incurred if you dial accidentally.

Saving emergency numbers:

Go to **SOS** ⇒ **emergency call-numbers** ⇒ choose the contact number (1-4) you want to save or edit ⇒ select *Options* with ⇒ **Options** ⇒ **Edit** ⇒enter the emergency number of your choice ⇒ confirm with

DISPOSAL

Disposal of packaging:

Packaging and packaging materials are recyclable and should always be returned.

Disposal of batteries:

Batteries must not be disposed of with domestic rubbish! As a consumer you are required by law to recycle used batteries. You may return them to your local collection point or to the dealer.

Disposal of the device:

Do not throw your mobile phone into the garbage, once it has outlived its usefulness. For the benefit of the environment, take it to a recycling location for used phones so it can be processed in an environmentally responsible way.

CORRECT USAGE

- This mobile phone is robust and designed for mobile operation. However, it must be protected from moisture (rain, bath...) and impact.
- Do not expose it to direct sunlight.
- Any utilization other than described above will cause damage to the device, and may be hazardous (electric shock, fire, etc.). The entire product must not be altered or rebuilt, and the housing must not be opened.
- The power plug is suitable only for use with residential-type outlets of the public mains with 230 Volt/50 Hz (10/16A) alternating current.
- The power supply is the power off mechanism of the device. The desktop charger must be close to the device and be easily accessible.

SAFETY INSTRUCTIONS

• Switch off the mobile phone in hospitals or in the vicinity of medical equipment, as the mobile phone may cause them to malfunction.

Keep your mobile phone a minimum distance of 20 cm away from pacemakers, if it is turned on.

- Never drive a car while holding the mobile phone in your hand. Observe national law and traffic regulations governing the use of mobile phones in traffic.
- Always turn off your mobile phone inside an airplane.
- You must switch off the mobile phone in the vicinity of petrol stations and other places with explosive materials.
- Don't shine the light directly into the eyes of people or animals.
- If the speaker or headset is set to a high volume this can cause hearing damage. Never hold the phone to your ear when the speakerphone mode is activated or the emergency button is pressed.

As a precaution, we recommend disconnecting the charger from the phone during a thunderstorm.
